

# GOAL 15 LIFE ON LAND

VERY **FAST** PEOPLE

VERY **Green** 

By 2030, the goal is to protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forest, combat desertification, and halt and reverse land degradation and halt biodiversity loss.

# Desertification

- In the world there are a lot of reforestation projects that aim to stop desertification in different areas of the planet.
- Further help against desertification comes from conservation farming, which aims to exploit the soil without impoverishing it, so as to prevent drying up.
- The European Union provides financial support to farms and farmers who grow in this way, particularly in the areas most at risk, such as the Mediterranean
- To counter the advancement of the desert, the African Union has launched a project called the **the great green wall.** it consists of the construction of a strip of trees 15000 km wide and almost 8000 km long in the region of sahel,on the southern edge of the Sahara.

#### Deforestation

Deforestation is the reduction of the earth's natural green areas, caused by the excessive exploitation of forest.

Forest are home to unique animals that are at risk of extinction. Many countries are trying to safe the climate and biodiversity

in the Philippines every student to graduate must plant at least 10 trees to prevent the deforestation

- Poaching is a term that indicates all hunting practices contrary to the law.
- In the fight against poaching in its various forms, numerous associations are active, in particular environmental protection, carrying out anti-phenomenon activities.
- In Italy are particularly committed and specialized, the Provincial Police, the Command unit for the protection of forestry, environmental and agri-food.

-

The regulations that aim at the prevention and repression of poaching are different, starting from Law February 11, 1992, n. 157.

# Poaching

# 15th goal and territory

#### **Biosphere Reserve Monviso**:

this territory covers 400.000 ha, between Italy and France, with multitude of different natural areas, nearly one thousand plant species and more than hundred animal species.

Natural Reserve of Lake Piano: is a small reserve in province of Como. It covers an area of 176 hectares of which 85 belong to the lake basin. In the reserve there is a vast fauna and a vast flora, among which we find the white water lily and the austropotamobius italicus shrimp. Furthermore, the reserve is recognized as a site of community importance by the EU.

## **OUR PERSONAL CONSIDERATIONS**

I chose goal number 15 because I know that I can do something to fight for the Earth, for this reason, every day, I try to do something to fight the pollution; starting from small actions, such as controlling how much water I use, preferring glass to plastic and making trips, as much as possible, ecological.

Soccali Matteo

I chose 15 goals because I am very worried about the future of my planet. I intend to work hard in the field of biology and green chemistry to try to save biodiversity especially from pollution

Pesenti Claudia.

### **OUR PERSONAL CONSIDERATIONS**

I chose goal number 15 because we don't have a planet B so if we lost the Earth we are dead. We must protect this planet, we can do it but only if everybody works together.

Spada Gioele

I chose goal number 15 because I think everyone could do something to protect the life on earth. I personally try to avoid the use of plastic, control the use of water in my house and use green energy.

Malik Yoel

### **OUR PERSONAL CONSIDERATIONS**

I chose goal 15 because the life of animals and plants is very important and it is because of us that many living beings are in danger. It is necessary that we solve the problem starting from the daily actions, informing and informing ourselves.

Elena Peyrache

I chose this goal because I love nature, biodiversity and life. I want to help our planet to become a better place for us, animals and plants. In fact I try to do my best in recycling, saving energy and protecting the environment and animals.

Giovanni Mulassano
